The one and only comprehensive collectible metalwares price guide has been completely revised and updated. With

over 1,400 entries, every major type of collectible metal from aluminium to tin and is covered. Each category includes detailed entries highlighted by numerous black and white photographs, as well as a 16-page colour section. Also features an introductory section on aluminium from expert author, Dannie Woodard; a glossary of selected metalwares terms; a bibliography; and an appendix that provides guidelines to understanding markings on common metalwares.

Expanded sections on silver flatware patterns, both sterling and silver plate, are also included. Drawing from specialists and current auction sales, this volume is a unique and valuable reference for collectors, dealers, appraisers, and researchers.
