Beginner's Guide to Beading on a Loom

Alexandra Kidd : Beginner's Guide to Beading on a Loom before purchasing it in order to gage whether or not it would be worth my time, and all praised Beginner's Guide to Beading on a Loom:

16 of 16 people found the following review helpful. Great PicturesBy M.Corrine PThis book has beautiful pictures of finished products and beading demonstrations/tips. It is a good source of color schemes and patterns. It could provide more pattern guides but the ones it does show are clear and easy to follow. Great book for new ideas and projects to do.11 of 11 people found the following review helpful. Beginner's Guide to Beading on a LoomBy JudithExcellent book. Highly recommend. I have a lot of beading books this one is one of the my favorites.29 of 31 people found the following review helpful. Great starter bookBy R. BrinsonDirections are clear. The photography is excellent. It's excellent for a loom beginner.

Beautifully woven beads have a wonder and texture all of their own and different shaped beads can be blended into an

amazing selection of stunning bags, beautiful bracelets, elegant necklaces, earrings, wall hangings and much more. Alexandra Kidd sparkles with enthusiasm as she presents this step-by-step guide to creating a whole range of original bead projects for everyone. Beginners and more experienced beadworkers will welcome this easy-to-follow book which is packed with techniques, tips and inspiration.

Jun 05 Alexandra Kidd is an experienced beader and, in this book on loom beading, she explains the basic techniques of using a loom, how to start the beading and finishing it off. There are ten projects in this colourful book and each one gives a different method of attaching handles, fringes and jewellery findings. A useful book for anyone starting on a loom. Workshop On The Web May 05 The word "loom" conjures up images of large pieces of equipment and the sort of hobby that takes over your house - and your life. But bead weaving isn't like that, and this primer certainly shows the basics in an easy-to-read format along with some illustrative projects. The early news that most of the projects in the book can be completed on a simple beginner's loom (I've even seen these in toy shops) had me cheering. The same can be said for the brief list of very ordinary items like squared paper, pencils, wire and pliers that are useful for weavers. Add beads and thread and you are off - even children can do this (presumably why toy shops stock looms). If this has you wondering how any book on the subject can make a mountain out of a molehill then this is all to the good, for some books do and this is the perfect antidote. When you have learned the process you can get designing, but first there are bracelets, belts, bags (lots of these for some reason), baubles and a bathroom decoration to make. There could have been a fancy necklace, or even a plain one but there isn't - instead a wall hanging and chess/checkers set shows imaginative use of the loom. There isn't anything too advanced in here - but if you know how to do it you won't want a book with "beginner" in the title anyway. A genuinely useful primer that taught this old hand a thing or two I wish I had known when I made my first choker... Myshef.com Aug 05 Loom beading is the easiest way to get professional beadwork results. From warping up to making brilliant bags and belts, you'll be amazed at how addictive this technique is. Popular Crafts Nov 05 So often titles promise more than the actual book can deliver, but we were pleasantly surprised to find just the opposite to be true with Alexandra Kidd's new book. She does an excellent job of explaining and illustrating the basics, from warping up to finishing the piece after it's been removed from the loom. In addition there are several very creative projects included here, such as a beaded chessboard and chessmen, and several innovative designs for purses and belts that incorporate fibres, wire and crystals. The ideas alone are well worth the purchase price. Bead Button Winter 05 There are some fascinating designs for purses and bags in this book making good use of the infinite variety, colour and texture of beads. The instructions are clearly laid out and some truly unique items can be produced quite easily. West Country Embroiderers About the Author Alexandra Kidd is an accomplished jewellery maker who runs a bead shop and mail order bead company in Kentish Town, North London. She specialises in beadwork and was a founding member of the Beadworker's Guild. She shows her designs at all the major UK exhibitions including Alexandra Palace (London), The National Exhibition Centre (Birmingham), Glasgow and Harrogate. Alex also organises jewellery parties to show her work in a low-key, convivial atmosphere.
