Bone, Ivory, and Horn: Identifying Natural Materials

Michael Locke : Bone, Ivory, and Horn: Identifying Natural Materials before purchasing it in order to gage whether or not it would be worth my time, and all praised Bone, Ivory, and Horn: Identifying Natural Materials:

In the pre-plastic era everything was made from natural materials, often by skilled craftsmen. The materials that they used are now often rare and easily misidentified. Are they made from bone, ivory, horn, tortoiseshell shell, skin or scales, or some other now forgotten exotic material? This technical book will help collectors, antique dealers, museum conservationists, and frequenters of flea markets to know more about the vast array of those artifacts, their biology, rarity, value, and how to conserve and restore them. Included in this comprehensive guide are hundreds of images of

actual collectibles ranging from knives to buttons.
