The best photography book ever for forgotten vintage America By Atomic Reverend Handyman As somebody whom has explored most of these sites in this book all I can say it is a great coffee table book, it is sad that most of this stuff has disappeared since the photos have been taken. I can only hope the awesome stuff tirelessly captured in these photos didn't end up in a land fill. 1 of 1 people found the following review

helpful. Salton Sea Test Base!!! By KC53 Perfect...lived at the Salton Sea Test Base back in '58-'59 when my Dad worked there for the Atomic Energy Commission. Our family lived inside the "Danger Test Area" of the SSTB and I was about five years old but remember it well before it was bombed out. My brother and I loved the pictures...we have old pics of what it used to look like when we lived there but loved seeing your work!! Thanks Troy...I e-mailed you back in 2007 after purchasing this book and we talked about the SSTB. Not too many people realize what it used to be.

Thanks for the pics!! 0 of 0 people found the following review helpful. Five Stars By Nate Troy has been one of my favorite photographers for many years. Wonderful coffee table book.

A stunningly photographed examination of the roadside icons that dot America's landscape. Lost America celebrates the boom-to-bust towns, aircraft bone yards, and filling stations of days past that were sacrificed at the altars of speed and technology and relegated to windswept desert plains and abandoned fields. The eye-catching and memorable

photography is complemented with a succinct text history that details the rise and fall of each subject. The result is an impressive tour of an America still standing, yet largely forgotten.
