The photos look like bad Xeroxes, the paper is needlessly heavy, and the organization within the sections seems arbitrary. It's helpful, but it could be so much more.1 of 1 people found the following review helpful. nice, but very hard to locate things in the book. Index could be improved on.By C. CoombsNice big book with lots of great photos and prices, but it's very hard to locate things in the book. They have a complete index of the Griswold mold numbers. It would have been so easy to add page numbers with the mold numbers so I could find things in the book. probably would not buy it again, but I am not going to bother to send it

back because it is a good reference book. 1 of 1 people found the following review helpful. Helpful reference with limitations. By Oscar This publication, though helpful is fraught with shortcomings. There is no cross reference guide making the book unnecessarily cumbersome locating a specific Griswold item with any degree of speed. There are Griswold items we have found which are not mentioned in this book making some Griswold purchases at best a guess. Several referenced Griswold products listed in this book does not have the needed p/n number notated on the page even though the p/n number is visible within the photograph of the product itself requiring the reader to write in the book to offset the careless omissions. We are now writing in our own cross index in the back of the book with notes on excluded p/n numbers on the reference pages as we encounter them. This is a helpful reference book and was written by enthusiasts excluding someone who writes reference material professionally prior to publication.

The Book of Griswold Wagner, referred to as the blue book by collectors is the most complete, accurate, and widely used reference and is coveted by collectors. It is now back in its 4th edition with even more pictures, updated values for cast iron cookware and kitchen collecting enthusiasts, and expanded charts. This definitive, encyclopedic guide details durable cast-iron antiques, including cornstick pans, griddles, Dutch ovens, gem pans, coffee grinders and roasters, trivets, molds, broilers, teapots, and much more. Nearly 1,000 photographs document variations of shape, size, dates, moldings, finishes, hardware types, catalog numbers, and markings. There are comprehensive histories of the manufacturers Griswold, Wagner, Sidney Hollow Ware, Favorite, and Wapak, as well as patent lists for meticulous researchers. This is an essential reference for anyone wishing to invest in these timeless treasures.

About the Author "The Pan Man," David G. Smith, is both a collector and dealer of cast iron cookware, and has assembled one of the finest collections of iron muffin pans in the nation. He resides in the Buffalo region of New York. Chuck Wafford, "Cast Iron Charlie" as he is been known, is a former flea market owner, nationally known Griswold collector, consultant, and appraiser. He lives in Oregon.
