We are planning to do the loop in the exact boat they live on. She shows that doing the Loop requires having a sense of humor and a close watch on the pocketbook. She describes the places they have visited so well that we want to hit those same spots. A wonderful enjoyable read.Lynn Kim Wilson0 of 0 people found the following review helpful. what I was hoping for.0 of 0 people found the following review helpful. The Captain's Log Diamond Lil Does The LoopBy Ron P. NewtonThe most entertaining book on cruising the loop that I've read. It has enough information on the logistics and ports of call to help if your planning on cruising all or part of the loop but not so much that it bores the reader. The writer and her husband are from Canada and seem to enjoy getting away from winter weather more than those of us who do not suffer thru harsh northern winters, the midwest winters are bad enough. If you dream of spending this winter away from the cold wind, snow and ice of winter this book is a excellent way to do that whether your going to point your boat south or just dream for of doing it.

Do you live for spring when the boat goes in the water? Do you suffer from post-boating-season depression when she is hauled back out in the fall? Do you ever wish, just once, that instead of hauling and dreaming about next year that you could just keep going and put a little water under your hull on a slow boat south? Have you ever wondered what it would be like to float down the mighty Mississippi River like Tom Sawyer on his raft, or look up from your aft deck at the Blue Moon of Kentucky? Dreamed perhaps, of feasting on grilled catfish in Tennessee and then heading off to catch a show at the Grand Ole Opry? Wondered what it would be like to glance over from the helm and witness a huge alligator slither into the murky waters of the Mobile River or stand out on the deck just a few feet from dolphins frolicking in your bow wake? Perhaps you can picture yourself docked in old Key West, catching a sundowner's party at Mallory Square, washed down with a cold one from one of Hemingway's old haunts or yourself in New York City, anchored under the towering Statue of Liberty, watching the busy harbor come to life while you sip your morning coffee? Doesn't that sound more appealing than a quick coffee from the drive-through coffee shop as you navigate traffic jams, snowstorms and business meetings? Each year many people just like you combine their love of boating with their love of travel and set off to explore America's Great Loop, a series of lakes, rivers, canals and waterways that connects a huge area of south central Canada and the eastern United States. Boaters from all over the world converge to enjoy this experience and many who have never owned a boat but always longed to try the cruising lifestyle make the leap, buy the boat and do what they must to become a looper. Were glad we did. Heres our story.
